Guidelines for writing

2. Abstract

This section provides a summary of the project work. This must highlight key objective and outcome of the project work.

3. Chapter One - Introduction

Clear research objectives to apply scientific reasoning to design an artefact to address a practical problem.

Introduction/Background

Research Problem

Research Objective

Research Significant

Organization of Study

4. Chapter Two - Literature Review

Citations of the works of key international scholars are essential.

5. Chapter Three - Research Methodology

Provide mainstream systems development methodologies.

6. Chapter Four - System Analysis and Design/Discussion

Demonstrate application of main theory accompanying the modeling and design by:

- a. Object-oriented modeling using use case, class and object-sequence diagrams are essential.
- b. Logical and physical designs of current and proposed systems.
- c. Presentation and discussion of functional and non-functional requirements of the proposed system

7. Chapter Five - Implementation and Evaluation

This involves Evaluation specifying practical testing plan including data collection, implementation

and significance/interpretation of evaluation results.

8. Chapter Six - Conclusion and Recommendation

Summary of the entire project/thesis, showing implications for policy and practice, and future research directions should be presented

9. References

Consistency in style used, alphabetical ordering, listed at the end of the dissertation/project.

Referencing style should be APA

10. Appendices

5000 to 8,000 words.
